# SUBJECT INDEX

**Academic preparation**
Can students' academic preparation predict success in the clinical chemistry laboratory? 629
**Anabolic steroids**
Anabolic steroids—The facts, 553
**Anemia of chronic disease**
Case Studies, 318
**Anti-Jk$^b$**
Case report of a neonate with an unexpected second antibody, anti-Jk$^b$, 225
**Antimicrobial removal**
Utility of resin devices as an adjunct to standard blood cultures, 617
**Antinuclear antibodies**
Applications of indirect immunofluorescence, 27
**Aspergillosis**
Evaluation of two commercial test systems for serodiagnosis of pulmonary aspergillosis and systemic mycoses, 273
Mycotic diseases and their diagnosis, 264
**Automation**
Automation and the distribution of testing in the clinical chemistry laboratory, 132
**Bacteremia**
Utility of resin devices as an adjunct to standard blood cultures, 617
**Bacterial antigens**
Immunoassay techniques in microbiology: Assessment of rapid detection methods, 33
**Blood bank**
Component therapy: Current concepts, 501
Cost-containment in the blood bank: Eliminating unnecessary serological testing, 485
**Blood cultures**
Blood cultures for mycobacteria, 611
Blood cultures: Principles and new approaches, 604
Present state of blood cultures, 601
Utility of resin devices as an adjunct to standard blood cultures, 617
Lysis-filtration and lysis-centrifugation Methods for Blood Cultures, 621
**Blood gases**
Blood gas temperature corrections (letter), 532, 592
**Blood smear**
Platelet morphology and the blood smear, 689
**B lymphocytes**
Immunoassays in hematology: Cell surface markers, 41
**Books Reviewed**
*Clinical and analytical concepts in enzymology,* 252
*Clinical guide to laboratory tests,* 520
*Clinical implications of laboratory tests,* 235
*Collection and handling of laboratory specimens: A practical guide,* 235
*The Effective Laboratory Supervisor,* 651
*Elementary principles of laboratory instruments,* 158
*Genetic disease: Diagnosis and treatment,* 159
*Illustrated manual of fluid and electrolyte disorders* (2nd edition), 520
*Laboratory evaluation of hemostasis and thrombosis,* 252
*Lynch's medical laboratory technology (4th edition),* 651
*Methods in enzymology, volume 84: Immunochemical techniques, Part D, selected immunoassays,* 237
*Methods in enzymology, volume 92: Immunochemical techniques, part E, monoclonal antibodies and general immunoassay methods,* 237
*Modern parasitology,* 252
*Procedure manual for clinical bacteriology (annotated),* 158
*White cell manual,* 238
**Case Studies,** 155, 174, 318, 419, 638, 724
**Cell surface markers**
Immunoassays in hematology: Cell surface markers, 41
**Cellular diagnosis**
Cellular diagnosis: Past, present, and future, 199
**Certification**
New trends in certification, 169
**Chemistry**
Anabolic steroids—The facts, 553
Exercise-induced changes in laboratory chemistries, 541
Exertional heat illness: A review, 547
Field evaluation of the Technicon RA-1000, 766
Free thyroid hormone assays: Diagnostic and cost consideration, 753
Laboratory diagnosis of inflammation and neoplastic thyroid disease, 758
Rate nephelometric inhibition immunoassay for quinidine and its active metabolites, 381
Screening for thyroid disease in the clinical laboratory, 747
**Coagulation factors**
Immunoassay applications in the evaluation of hemostasis, 51
**Compatibility testing**
LISS panagglutination interfering with compatibility testing, 564
**Component therapy**
Component therapy: Current concepts, 501
**Computers**
Computer graphic representation of multivariate laboratory data, 353
Considerations in microcomputer purchase for medical technology educators, 720
Medical information systems: Current aspects and implications, 370
Use of computer graphics to assess trends in glomerular filtration rate (GFR) from sequential serum creatinine values, 361
Using expert systems for interpretive reporting, 366
**Cost-containment**
Cost containment in the blood bank: Eliminating unnecessary serological testing, 485
**Creatinine**
Use of computer graphics to assess trends in glomerular filtration rate (GFR) from sequential serum creatinine values, 361
**Cryptosporidium**
Fecal staining methods for screening *Cryptosporidium* oocysts, 560
**Crystalcryoglobulinemia**
Case Studies, 174
**Cytochemistry**
Quantitative electron microscopy and ultrastructural cytochemistry in the diagnosis of hematologic disorders, 206
**Cytology**
An "abnormal" Pap smear: What does it mean?, 905
Cytology-histology-pathology: Some history, 881
Differential diagnosis in effusion cytology, 885
Fine needle aspiration cytology, 896
Hormonal cytology, 902
**Density gradient**
A discontinuous density gradient method for separating reticulocytes, 568
**Dichloromethane elution**
Dichloromethane elution for routine use in a transfusion service, 772
**Disease prevention**
Health promotion/disease prevention: Threat or promise to medical technology, 279
**DNA probes**
The future: DNA probes for microbial detection, 835
**Dohle bodies**
Case Studies, 419
**DRG's**
DRG's and laboratory employment, 339
**Editorial**
A new time/A new outlook, 4
Getting medicare back on track, 86
Moving forward together, 410
New trends in certification, 169
One voice, one vision: Two views, 328
Progress in clinical laboratory practice: A legislator's view, 246
**Education**
Can students' academic preparation predict success in the clinical chemistry laboratory? 629

Considerations in microcomputer purchase for medical technology educators, 720
Exploring ethical issues in health care, 916
Five-step approach to bench teaching, 573

Teaching professional responsibilities and development within a medical technology curriculum, 284

**Electron microscopy**
Quantitative electron microscopy and ultrastructural cytochemistry in the diagnosis of hematologic disorders, 206

**ELISA**
Rapid viral diagnosis, 817

**Enzyme-Linked immunosorbence assay**
Evaluation of a commercial enzyme-linked immunosorbence assay for the detection of *Neisseria gonorrhoeae* infection, 127

**Enzyme-Linked immunosorbence assay**
Evaluation of a commercial enzyme-linked immunosorbence assay for the detection of *Neisseria gonorrhoeae* infection, 127

**Erythrocyte sedimentation rate**
Technical note, 840

**Erythroleukemia**
Case Studies, 638

***Escherichia coli***
Minute mystery, 10

**Exertional heat illness**
Exertional heat illness: A review, 547

**Expert systems**
Using expert systems for interpretive reporting, 366
Evolution and future directions of federal regulation of clinical laboratories, 776

**Fecal staining**
Fecal staining methods for screening *Cryptosporidium* oocysts, 560

**Federal regulation**
Evolution and future directions of federal regulation of clinical laboratories, 776

**Fine needle aspiration**
Fine needle aspiration cytology, 896

**1st joint AMT/ASMT Meeting**
Abstracts of papers, 386
Exhibitor product list, 425
Preliminary program, 295

**Fluorescent antibody stains**
Importance of bacterial stains in the diagnosis of infectious disease, 823

**Flow cytometry**
Cellular diagnosis: Past, present, and future, 199

**Glomerular filtration rate**
Use of computer graphics to assess trends in glomerular filtration rate (GFR) from sequential serum creatinine values, 361

**Government Affairs**
Progress in clinical laboratory practice: A legislator's view, 246

**Gram stain**
Importance of bacterial stains in the diagnosis of infectous disease, 823

**Grants & awards**
AMT awards: 1984-85, 843
ASMT education & research fund, Inc. Honors, research grants, scholarships, 1984-85, 845

**Graphic display**
Computer graphic representation of multivariate laboratory data, 353
Use of computer graphics to assess trends in glomerular filtration rate (GFR) from sequential serum creatinine values, 361

**Health care financing**
Health care competition in the 1980's: A vocabulary for survival, 68

**Health promotion**
Health promotion/Disease prevention; Threat or promise to medical technology, 279

**Hematocrit**
Question and answer, 337

**Hematology**
Case Studies, 318, 724
Exertional heat illness: A review, 547
Questions and answers, 337

**Hemodialysis**
Acid-base changes in hemodialysis and peritoneal dialysis, 118

**Hemolytic disease of the newborn**
Case report of a neonate with an unexpected second antibody, Anti-$Jk^b$, 225

**Hemostasis**
Immunoassay applications in the evaluation of hemostasis, 51

**Henderson-Hasselbach equation**
Current controversy in acid-base chemistry: Inconstant constants in the Henderson-Hasselbach equation, 109

**Hepatitis B**
Clinical and serological aspects of hepatitis B, 469
Clinical chemistry profile of hepatitis B, 463
Immunoprophylaxis: Towards control of hepatitis B, 477

**Histiocytosis**
Case Studies, 155

**Histoplasmosis**
Evaluation of two commercial test systems for the serodiagnosis of pulmonary aspergillosis and systemic mycoses, 273
Mycotic diseases and their diagnosis, 264

**Hospital vs. university schools of medical technology**
Professional Issues, 581

**Histology**
Cytology-histology-pathology: Some history, 881
Quality assurance program for the histopathology laboratory, 909

**Immunoassay**
Applications of immunoassay to therapeutic drug monitoring, 47
Immunoassay applications in the clinical laboratory: An introduction, 25
Immunoassay applications in the evaluation of hemostasis, 51

**Immunofluorescence**
Rapid viral diagnosis, 817

**Immunohematology**
Component therapy: current concepts, 501
Cost-containment in the blood bank: Eliminating unnecessary serological testing, 485
Dichloromethane elution for routine use in a transfusion service, 772
Protocol for the use of Lewis-neutralized serum in prenatal antibody screening, 377

**Immunoprophylaxis**
Immunoprophylaxis: Towards control of hepatitis B, 477

**Indirect immunofluorescence**
Applications of indirect immunofluorescence, 27

**International association of medical laboratory technologists**
The international association of medical laboratory technologists: A personal view, 578

**Interpretive reporting**
Computerized interpretive reporting of acid-base data: A review and comment, 113
Using expert systems for interpretive reporting, 366

**Iron deficiency anemia**
Case Studies, 641

**Laboratory charges**
Workload units: A basis for laboratory charges, 571

**Laboratory employment**
DRG's and laboratory employment, 339

**Lewis blood-group system**
Protocol for the use of Lewis-neutralized serum in prenatal antibody screening, 377

**LISS**
LISS panagglutination interfering with compatibility testing, 564

**Liver enzymes**
Clinical chemistry profile of hepatitis B, 463

**Lymphocytes**
Lymphocyte counts (letters), 530
Quality control of lymphocyte counts: Coulter counter model S-Plus II in an outpatient clinic, 59

**Lysis-concentration**
Lysis-filtration and lysis-centrifugation methods for blood cultures, 621

**Management**
Automation and the distribution of testing in the clinical chemistry laboratory, 132
Effects of regulatory controls on the accuracy of clinical laboratory tests, 632
Health care competition in the 1980's: A vocabulary for survival, 68
Prospective payment: A sign of the changing times, 62

Blood cultures for mycobacteria, 611

**Mycology**
Clinical mycology in the 1980's, 263
Culturing sputum for systemic fungi, 269
Evaluation of two commercial test systems for the serodiagnosis of pulmonary aspergillosis and systemic mycoses, 273
Mycotic diseases and their diagnosis, 264

**Natural killer cells**
Quantitative electron microscopy and ultrastructural cytochemistry in the diagnosis of hematologic disorders, 206

**Nephelometric inhibition immunoassay**
A rate nephelometric inhibition immunoassay for quinidine and its active metabolites, 381

**Neutralization tests**
Protocol for the Use of Lewis-neutralized serum in prenatal antibody screening, 377

***N. Gonorrhoeae***
Evaluation of a commercial enzyme-linked immunosorbence assay for the detection of *Neisseria gonorrhoeae* infection, 127

**Nocardiosis**
Nocardiosis, 267

**Panagglutination**
LISS panagglutination interfering with compatibility testing, 564
